

This petition describes what I believe to be the one idea that best represents my position on this matter.

1.) Element 1 is no longer absolutely necessary

2.) There should be a mechanism to promote this mode. Retaining this requirement for the Extra Class makes the most sense.

3.) This retains the present 3 class system with appropriate incentives provided at each stage.

The only problem that I see with this petition is in the definition the mode in question. He identifies it as CW, which is inaccurate. I'm sure the commission will select the correct wording any future report and order that is issued in this case.

I therefore would ask the commission to act expeditiously in this this matter.

Respectfully Submitted

Kenneth E. Stringham, Jr., AE1X
